

The Complete Oasis System:

Atlantic's Oasis System offers the same quality as contractor grade equipment, simplified and downsized for smaller projects. "Simplified" does not mean a reduction in quality. On the contrary, we have developed a line of products specifically for contractors and DIY homeowners working on smaller installations that still demand the highest quality. Features include:

- *Easy to install and maintain:* While still offering the same quality as our Pro Series, Oasis products were designed to cater to the inexperienced builder that may be new to water gardening. The only tools needed to install Oasis Series products are a screwdriver and a hand saw.
- *Durable, sturdy components built to stand the test of time:* A deeper skimmer that houses oversized filtration components, a FilterFalls with a solid lip and molded-in inserts, a sturdy pump vault that will never warp out of shape and a FastFalls designed to eliminate leaks.
- *Easy to sell:* With a streamlined product offering, designed to cover a large array of installations, there will never be any question as to which components to use.

With this easy-to-understand system, you can truly relax; we've got your backyard Oasis.

Pond-free application of products

Oasis Pond-free Products

Oasis Pond-free products bring the quality and strength you've come to expect from Atlantic to the retail market, with more compact, easier to install products that are built to withstand the same abuse as our Pro products. Count on Atlantic's Oasis Series to deliver the performance you need for all your smaller pond-free features.

OASIS

Application: Pond-free

NEW!

Model: FB2400
Dimensions: 24"L x 24"W x 10"H
Max Pump Flow: 750 gph
Plumbing Size: Up to ½"
Capacity: 20 Gallons
Application: Pond-free Fountain

Oasis Pump Vault (PV1700) Features:

1. Inset lid keeps gravel from falling into the vault
2. Pump discharge step fittings for 1½" & 2" pipe provided on both sides of the vault
3. Flat front panel installs tight against the Eco-Blox for a compact basin
4. Recessed pockets accept Triton 3-Way Diverter for use with the NEW Eco-Rise (see pg. 25)
5. Flat panel for 1½" pipe for use with the NEW Eco-Rise

Oasis Fountain Basin

The new Oasis Series Fountain Basin offers the strength and features that set it apart from the rest. Recessed plumbing channels, molded support cone and heavy wall thickness normally found in contractor grade equipment make this basin the best choice for retail applications.
