Ingredient	CAS#	% Concentration
Trichloro-s-triazinetriene	87-90-1	99.0

SECTION 4 FIRST AID MEASURES

Inhalation:	Remove person to fresh air. If person is not breathing, give artificial respiration, by mouth to mouth if possible. Contact a physician
Skin Contact:	Take off contaminated clothing. Wash skin thoroughly with soap and water for 15 minutes. Seek medical attention.
Eye Contact:	Flush eyes with plenty of water for 15 minutes. Seek medical attention.
Ingestion:	Drink 2 or 3 glasses of water, rinse mouth. Do not give anything to an unconscious person. Do not induce vomiting, unless directed to do so by a doctor. Contact a physician immediately.
Note to physicians	Probable mucosal damage may contraindicate the use of gastric lavage. Corrosive. Treat symptomatically and supportively.

SECTION 5 FIRE – FIGHTING MEASURES

Hazardous Combustion Products:	Small quantities of water will react with this material which will form nitrogen trichloride, which is violently explosive.
Unusual Fire or Explosion Hazards:	When heated to decomposition, may release poisonous and corrosive fumes of nitrogen trichloride, chlorine, nitrous oxides, cyanates, carbon monoxide and carbon dioxide.
Sensitivity to Mechanical Impact:	None
Rate of Burning:	Not applicable
Explosive Power:	Not applicable
Sensitivity to Static Discharge:	None
Fire Extinguishing Media:	Water only. Large amounts of water may be needed and the flow of water should not be stopped until the fire/reaction has stopped.
Instructions to the Fire Fighters:	Cool containers with water spray. On small fires, use water spray or fog. On large fires, use heavy deluge or fog streams. Flooding amounts of water may be required before extinguishment can be accomplished.
Fire Fighting Protective Equipment:	Fire fighters should wear full protective clothing and self-contained breathing apparatus (SCBA) in positive pressure mode.

SECTION 6

ACCIDENTAL RELEASE MEASURES

Leak And Spill Procedure: Prevent spillage from contaminating soil or entering waterways, sewers, drains and confined areas. If material is spilled, clean up as soon as possible to prevent contamination with a material with which it will react. Keep spilled material dry. Sweep up and place material in a dry, clean and labeled container.

SECTION 7

HANDLING AND STORAGE

HANDLING

Handling Practices: Avoid skin, eye and clothing contact. Wash hands thoroughly with soap and water after handling.

Ventilation Requirements: Local exhaust ventilation.

STORAGE

Ventilation Requirements: Store in a cool, dry and well ventilated area away from incompatible materials.

Storage Requirements: Do not store material at temperatures above 60°C/140°F. Available chlorine loss can be as little as 0.1% per year at ambient temperatures. Do not allow water to get into container. Keep containers tightly closed when not in use.

SECTION 8

EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS

Engineering Controls: Local exhaust ventilation.

PERSONAL PROTECTIVE EQUIPMENT

Skin (Specify): Nitrile or neoprene gloves if skin contact is likely.

Eye (Specify): Safety goggles/glasses or face shield if eye contact is likely.

Respiratory (Specify): Use NIOSH/MSHA approved dust or vapour mask when airborne exposure limits are exceeded. An approved respirator with an acid gas (for chlorine) and dust prefilter may be adequate.

Other (Specify): Body covering clothes and boots. Safety shower and eye wash stations are close to work area.
