

Placed on either side of the filter carriage, the BioCurtain™ provides a large surface area for colonizing beneficial bacteria to reduce ammonia toxins from fish waste and fish food. The stainless steel hanger positions on the Filter Tank rim providing easy removal and cleaning of the poly-flow filter media.

## STAINLESS STEEL TRACKING HANGER

- Provides full length support and easy removal of filter media

## HIGH PERFORMANCE OPEN WEAVE CURTAIN

- Assures unrestricted water flow regardless of pumping volume
- Provides an excellent colonization media for beneficial bacteria
