Combination Ball / Swing Check Valves

Standard series PVC combination ball / swing check valves allow for wastewater pumping applications combining both in-line shut off and back flow prevention. The check valves feature an angled design, minimizing flow reversal and potentially damaging hydraulic shock (water hammer). This, coupled with corrosion resistant non-metallic components, results in a long lasting reliable valve.

Quiet series combination valves are a great solution for sump, sewage, pool and spa applications, ideal when extremely quiet operation is desired. Quiet series valves offer all the features as the standard series, with the addition of a spring loaded flapper which closes quicker, eliminating noise caused by water hammer.

**STANDARD SERIES:
17SCBV**

**QUIET SERIES:
17QSCBV**

Features	Standard	Quiet
Full port design for less friction and easier pumping	✓	✓
True union desing for servicing	✓	✓
Double O-ring valve seal on blow-out proof stem	✓	✓
Polyethelene ball valve seats	✓	✓
Durable ABS ball valve handle	✓	✓
Compatible with schedule 40 & 80 pipe	✓	✓
Designed for horizontal or vertical installation	✓	✓
Angled seat minimizes water hammer	✓	✓
Neoprene Seal	✓	✓
Low cracking pressure ensures minimal pressure drop across the valve	0 PSI	1/2 PSI
Spring Loaded Flapper Assembly		✓
S.S. Hinge Pin and Torsion Spring provide excellent corrosion resistance for longer life		✓
No metallic parts, corrosion resistant for longer life	✓
